## Jamestown Employers/Business Owners:

The Village of Jamestown income tax rate will increase to 1% effective January 1, 2025 on wages, commissions, net profit and other compensation. (This is .01 of gross Medicare wages or other taxable income.) The current rate of .5% (.005) has been in effect since 1987. All Jamestown employers are mandated to withhold the income tax from all employee wages, regardless of where they reside.

If you use an outside agency, accountant or tax service to process your payroll, please forward this information to them.

Also effective January 1, 2025, the full (100%) credit for tax paid to another municipality will decrease to 50%. This ONLY pertains to your company IF you have locations, branches or satellite offices in another municipality that has their own income tax that employs Jamestown residents. As a courtesy, you may withhold the .5% from Jamestown residents, in addition to the income tax for the other municipality. For instance, if you have a business within the Xenia City limits and have Jamestown residents working at that location, you would withhold the Xenia City income tax as well as the .5% (.005) for Jamestown. (Note - You will withhold the 1% (.01) from all employees working at the Jamestown location.)

Many Jamestown employers file their deduction reports and pay the remittance online through Ohio Business Gateway. This is a reliable service through the State of Ohio at no cost.

Please call if you have questions or need additional information.
